

Milk is
yellow

An
orange is
white

What Color Is It?

A carrot
is green

A magpie
is pink

A
butterfly
is green

I'm
confused.

Milk is
yellow

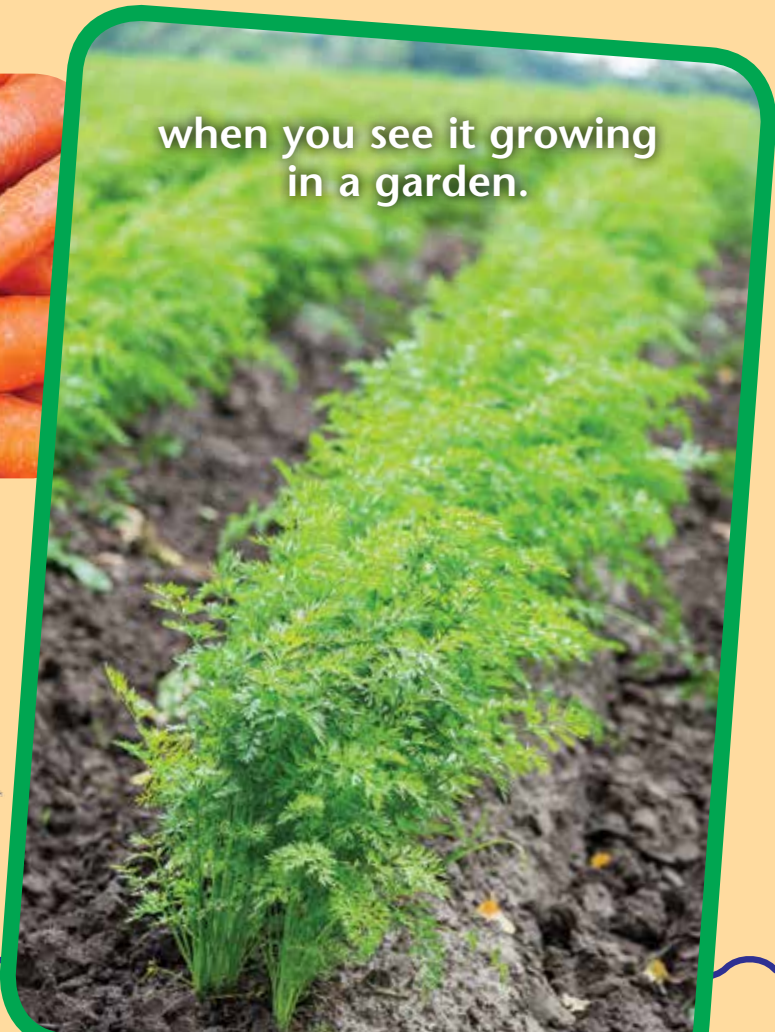

when it gets made
into cheese.

A carrot
is green

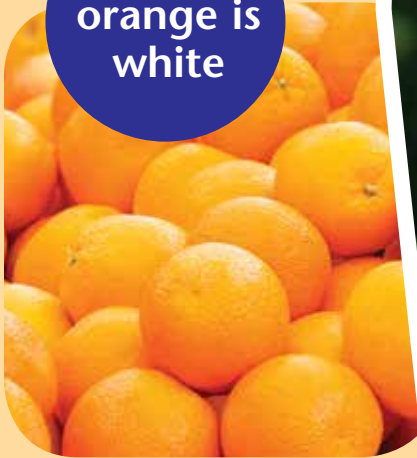

when you see it growing
in a garden.

Now that
makes more
sense.

An orange is white

when its flower has not yet grown into a fruit.

A butterfly is green

A magpie is pink

when it's a caterpillar.

when it first hatches from its egg.

It all depends on when and how you look.
